TAGS PVT. LTD.

A STYLE FOR EVERY STORY

YOUR ONE STOP SHOP FOR LABELS
INDIA'S LARGEST WOVEN & PRINTED LABEL MANUFACTURER

ABOUT US

WE BELIEVE PRODUCT LABELS ARE AS IMPORTANT AS THE PRODUCT ITSELF, WHICH IS WHY WE MANUFACTURE CUSTOM LABELS AND TAGS THAT HELP YOU ESTABLISH YOUR BRAND'S IDENTITY AND MAKE YOUR GARMENTS STAND OUT FROM THE REST.

Set up in 1994, Unique Tags Pvt. Ltd. started with manufacturing woven clothing labels and tags for businesses. The company has come a long way since, with exponential growth in terms of number and types of processing machines, customer demand, and product variety and output.

Today, Unique Tags Pvt. Ltd. caters to over 5,000 national and international brands with its customer base spread over India, the US, the UK, Australia and the Middle East, among other countries. We meet the needs of our ever-growing clientele with a bevy of equipment like cut and fold, sizing, warping, fusing, finishing, laser die cutting and ultrasonic slitting machines. We have also

expanded our product line and manufacture woven and printed patches, woven key chains, fabric calendars, and more in addition to woven and printed labels and hangtags.

With a mission to provide superlative quality to our customers coupled with exemplary service that speaks volumes about us, we aim to become the one-stop shop for various textile labels and other accessories.

We are sure that our continued efforts to provide quality products and quick service will help us get there!

Meanwhile, let's help you get started on your search for the right product.

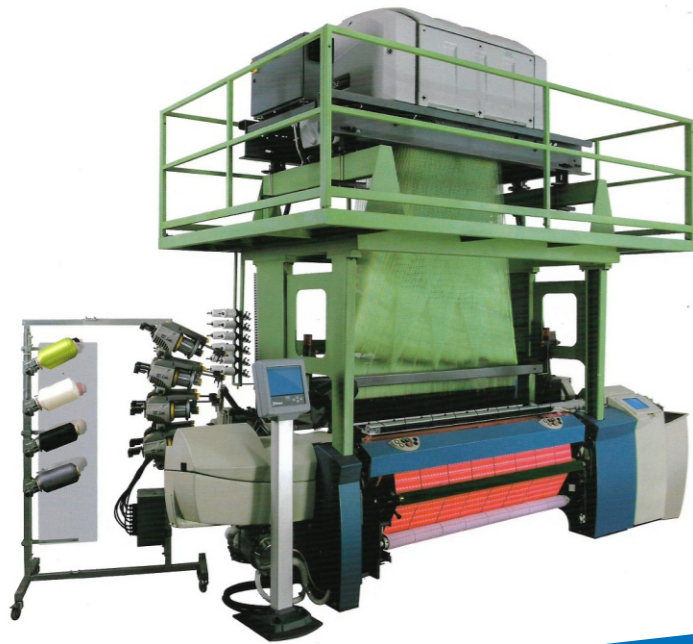

Unique is part of the Mardia family group which has more than 40 years experience in the steel & chemical industries. Grace Castings Ltd is a sister concern.

PROCESS

APPROVAL STAGE:

We begin with procuring designs from the customer, after which our team starts work on producing a sample label. The same is submitted to the customer for feedback or approval within 24 to 48 hours.

Bulk production starts once customer approval is received.

MANUFACTURING STAGE:

From the designing unit, the final design moves to the manufacturing unit. Colour matching is an integral part of this process, where we use Pantone and other approved shade cards to select weft yarn colours. We then ensure that the selected colours match those on our machine software.

Next, our machine department takes over the label production. Our electronic Jacquard machine employ the latest foreign technology ensuring labels produced are flawless. We have an in-house warping unit where the finest quality warp beams are produced. This helps maintain the quality of our labels! Our printed label division uses the best quality tapes & inks which comply with OEKO-TEX.

The entire process is under constant supervision of qualified and well-trained professionals.

DISPATCH STAGE:

At this stage, labels produced are in roll form. They are then sent to our Cut and Fold department where various process like Ultrasonic/Musonic/Laser Cut and merrowing, die-cutting, fusing, gumming, etc. are carried out depending on customer's requirement.

Finished goods undergo a strict quality control and final checks before being meticulously packed in special boxes or PP bags so as to keep the labels from twisting and damage of any kind.

Finally, our dispatch department takes care of the invoicing and couriers the goods to our customers.

QUALITY CONTROL

We understand that Quality Control is an essential part of building a successful business and that to exceed customer expectations, we have to be on our toes all the time! We are certified by TQP & ISO 9001:2015

At Unique Tags Pvt. Ltd., we fortify our skilled and efficient team with technological advances so that they can stay abreast with new methodologies. We also encourage our Research and Development team to evolve and devise methods to further improve performance.

We do not compromise on the quality of raw material that we use, working only with international standard warp yarn and weft yarn. Additionally, we work on first-rate machines that are maintained by our experienced staff regularly.

We are OEKO-TEX standard 100 certified, all yarns, inks & tapes are certified.
